Abstract
Arizona Center for African American Resources is supporting African American youth and families to access critical life resources to make a brighter future.

Project Description
What
Pass To Win created a new website to register for AZCAAR Programs.

Why
The users will gain access to certifications, learning opportunities, and career building experiences that can help them take their skills to new heights.

Who
Provide opportunities for the low-income African American community to learn and grow educationally.

Process
Structured Analysis for concept to logical design; Agile iterative method for build to deployment.

Features
- Allows users to apply for certifications and take exams.
- Job search function to search for open positions.
- Various Workshops to help learn new skills.

Lessons Learned
- Research the limitations of the tools before you use them.
- Document in the requirements the small things to add to the website before you start coding.
- Do a better job of sticking to the schedule.

Technologies
- WebFlow
- Zapier
- MemberStack
- Airtable
- JIRA SCRUM

Future Work
- Implement a chat bot.
