Abstract
The process of receiving weather, news and traffic updates is readily available to the general public, but it takes multiple applications.

Project Description
What
Essential Life provides the information that you need in the morning all in one place; news updates, weather forecast, and traffic activity.

Why
To eliminate the need to use different applications just to know what is happening in the world.

Who
Users that want to use less applications to learn what is essential in life.

Process
Structured Analysis for concept to logical design; Agile iterative method for build to deployment.

Features
- Weather
- News Updates
- Maps with Traffic Updates
- User Profile.

Lessons Learned
- Planning is always needed and be aware of limitations when planning.
- How to properly deploy a website and connect WordPress with Azure
- Always back your work.

Technologies
- Visual Studio Code
- Microsoft Azure
- WordPress/Nicepage
- MySQL
